Sanitizing Solution

How to mix bleach (chlorine) solution for sanitizing:

What you’ll need:
• Ordinary household bleach solution and water
• Tablespoon
• Measuring cup
• Spray bottles – label container “sanitizer”

To sanitize:
Mix 1 tablespoon of household bleach with 1 gallon of water for a solution strength of 200ppm. Put sanitizing solution in spray bottles and label “sanitizer”.

Remember:
• Make a new sanitizing solution at the start of your event.
• Do not mix bleach with detergent.
• Using chlorine test strips, check the strength of the solution.
• Discard sanitizing solution every 3 hours or as needed. The strength of the solution will be weaker at the end of the day.
